

ROBOT MOVEMENT - DRIVING

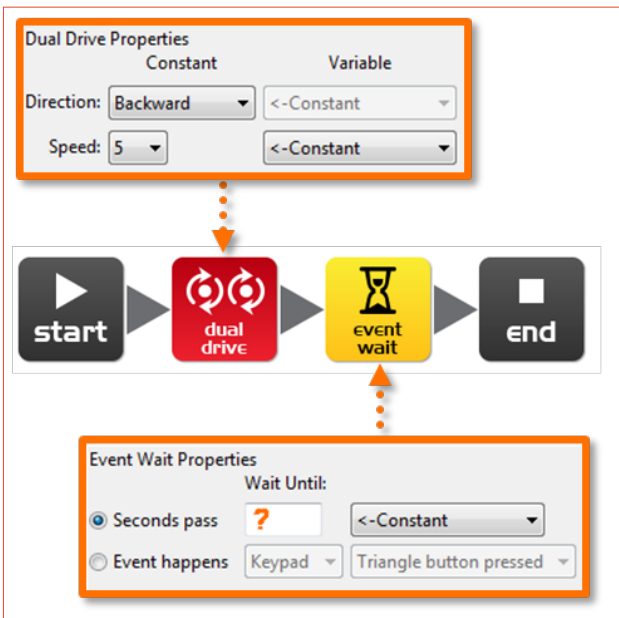

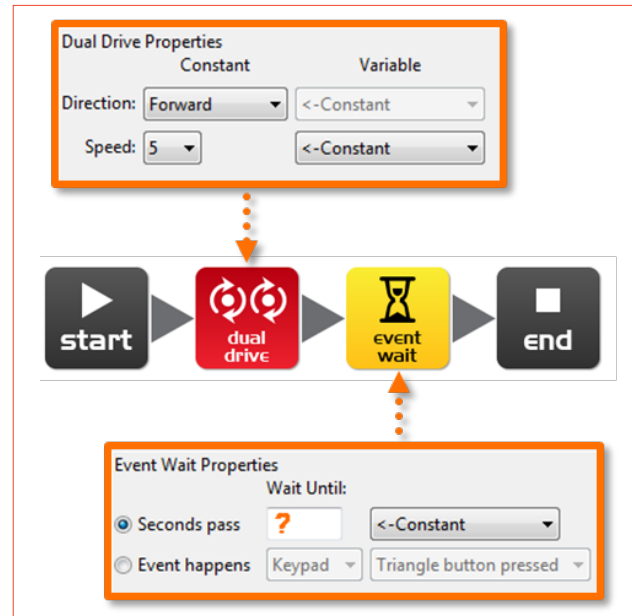

Card 3 of 6

I'm Learning: ROBOTICS/PROGRAMMING

- 1 Write the following program to drive the Edison robot forward. Use the Start/Finish Activity sheet as start and stop markers. In the Event Wait properties, set the 'Seconds pass' to an amount of time in seconds to have the robot start from behind the Start line and finish just before the Finish line. Try different amounts of time until your robot drives forward and stops just before the finish line

Q. What happened?

- 2 What is the correct amount of time to get your robot from the start line to the finish line?
- 3 Describe what the robot is doing and why?

- 4 Write the following program to drive the Edison robot backward. Does it look familiar? Use the Start/Finish Activity sheet as start and stop markers. Once again, modify the 'Seconds pass' property to an amount of time in seconds to have the robot start from behind the Start line and finish just before the Finish line. Try different amounts of time until your robot drives backwards and stops just before the finish line.

Q. What happened?

- 5 What is the correct amount of time to get your robot from the start line to the finish line?
- 6 Is this time different from the time it took when going forward in step 2?
- 7 Describe what the robot is doing and why?
