

- 1 Edison is a small LEGO compatible and programmable robot. Edison uses sensors and motors to interact with the world. In the images below you can see Edison's sensors, buttons and switches.

- 2 There are three buttons on top of the Edison:

Play: Start program

Stop: Press to stop a program

Record: 1 press = download program; 3 presses = read barcode

- 3 Edison's line tracking sensor is made up of two parts: a red LED light; a light sensor.

The line tracking sensor also reads special barcodes that activate pre-installed programs

- 4 The EdComm cable is used to download your programs to the Edison. It connects to the headphone socket on your laptop, tablet or Pi.
